

Internship opportunity

ETA Florence Renewable Energies provides high level scientific and engineering services within the renewable energies and environment sectors. Among the activities undertaken is the conception, preparation, organization and management of a series of high level and large-scale international conferences, workshops, seminars and exhibitions in the field of renewable energies.

ETA continuously offers several traineeship opportunities. These opportunities may be taken in disciplines like marketing, policy, research, projects, communication, media, web, and business development. It is a great opportunity to gain practical knowledge and experience from multicultural experts in a modern work environment.

In order to apply for such a traineeship, please send your CV and cover letter to job@etaflorence.it with reference "Traineeship".
