

IEA Bioenergy  
Technology Collaboration Programme

# WEBINAR SERIES

## Flexible Bioenergy in Renewable Energy Systems

March 18, 2021

4:00 pm - 05:30 pm Central European Time  
03:00 pm - 04:30 pm Greenwich Mean Time  
10:00 am - 11:30 am North American Eastern Standard Time

**Moderator**  
**Jaap Kiel**

Programme Manager,  
Biobased Fuels & Chemicals,  
TNO,  
The Netherlands

**Presenter**  
**Daniela Thrän**

Senior Scientist, Bioenergy  
and Bioeconomics,  
German Biomass Research  
Centre (DBFZ),  
Germany

**Presenter**  
**Elina Mäki**

Research Scientist, Energy  
Production and Carriers,  
VTT Technical Research  
Centre of Finland,  
Finland

**Presenter**  
**Tilman Schildhauer**

Senior Scientist, Thermochemical  
Processes,  
Paul Scherrer Institute,  
Switzerland

## Introduction

The global energy system transition is driven by steep reductions in the generation costs of wind and solar energy as well as political efforts to reduce greenhouse gas emissions. Growing shares of variable renewable energy (VRE) in the energy supply system poses concerns about guaranteeing an uninterrupted supply of electricity, balancing seasonal imbalances in supply and demand, and providing renewable fuels in all sectors. Bioenergy can play multiple roles, both during the transition phase and in the long-term. Flexible bioenergy concepts have potential to provide low-carbon dispatchable resources in terms of long-term storage, peak demand/back-up and demand response. However, the flexibility of bioenergy as well as attractive business cases motivating for flexibility provision need to be developed. IEA Bioenergy Task 44 aims at creating a clearer picture on the role of bioenergy as a flexible resource. In addition to understanding the technical maturity, market status and R&D needs of different concepts, it is also important to identify the frame conditions affecting the prioritisation of the different solutions. The webinar presents the findings on technical options for providing flexibility from bioenergy and framework conditions and expectations in different countries. The associated reports *Flexible bioenergy - Technical options* and *Expectations and implementation of flexible bioenergy in different countries* will be published soon.

The IEA Bioenergy Technology Collaboration Programme (TCP) is organised under the auspices of the International Energy Agency (IEA) but is functionally and legally autonomous. Views, findings and publications of the IEA Bioenergy TCP do not necessarily represent the views or policies of the IEA Secretariat or its individual member countries

Register for the webinar at= [https://us02web.zoom.us/webinar/register/WN\\_0TFSJZD4Tu--5NPVjbn3wA](https://us02web.zoom.us/webinar/register/WN_0TFSJZD4Tu--5NPVjbn3wA)

Unable to attend the live lecture? Lectures will be recorded and archived for later viewing at <https://www.ieabioenergy.com/iea-publications/webinars/>

All electronic lectures are free
