

IEA Bioenergy
Technology Collaboration Programme

WEBINAR SERIES

Integration of Biogas Systems into the Energy System

January 21, 2021

4:00 pm - 5:00 pm Central European Time
10:00 am - 11:00 am North American Eastern Standard Time
3:00 pm - 4:00 pm Greenwich Mean Time

Presenter & Moderator
Prof. Jerry D. Murphy

Director SFI MaREI Centre for Energy,
Climate and Marine,
Director of Bioenergy and Biofuels Research
Environmental Research Institute
University College Cork,
Ireland

Presenter
Dr.-Ing. Jan Liebetrau

Head of Department
Consulting and Research,
Rytec GmbH
Germany

Introduction

Biogas is a versatile energy carrier which can be used to produce electricity, heat and after upgrading serve all functions of natural gas, including transport. Biogas systems are highly scalable in their energy output according to the demand from the particular energy sector. The flexibility of biogas systems can facilitate electricity production at a dynamic schedule to match an electricity demand profile, while facilitating voltage and grid stability. As a decentralised component of the overall energy system biogas systems can function as an infrastructure hub for local energy consumers in rural areas. Biogas can play an essential role (together with PV and wind) as part of a virtual power plant in local distribution energy grids. Biogas systems can operate as a biological battery in coupling the electricity and gas grids using surplus electricity to produce hydrogen to react with biogenic CO₂ in biogas producing biomethane and increasing the output of biomethane (typically by 70 %). Innovation and ingenuity will be required of biogas operators in future energy systems. IEA Bioenergy Task 37 recently published a new report highlighting how to match biogas supply and demand for energy as electricity, heat or transport biofuel across the larger future energy system. This webinar will present the main conclusions.

The IEA Bioenergy Technology Collaboration Programme (TCP) is organised under the auspices of the International Energy Agency (IEA) but is functionally and legally autonomous. Views, findings and publications of the IEA Bioenergy TCP do not necessarily represent the views or policies of the IEA Secretariat or its individual member countries

Register for the webinar at https://us02web.zoom.us/webinar/register/WN_uHf0Wwr2Tye6PIJ8exrqhQ

Unable to attend the live lecture? Lectures will be recorded and archived for later viewing at <https://www.ieabioenergy.com/iea-publications/webinars>

All electronic lectures are free
