

**Sustainable Agrivoltaics: ENEA and ETA – Florence Renewable Energies  
sign a Memorandum of Understanding for National Network**

Agrivoltaic is a combination of solar energy and agriculture that can promote the decarbonization of the energy system, but also the sustainability of the agricultural sector and the long-term profitability of small and medium-sized enterprises.

These are the objectives of the first national platform for Sustainable Agrivoltaic promoted by ENEA with the aim of bringing together companies, institutions, universities and trade associations around a single working table. In support of the network, ENEA and ETA - Florence Renewable Energies are launching the Sustainable Agrivoltaic Platform, which aims to promote the exchange of information between all stakeholders involved and to fuel activities that will help identify guidelines, methodologies and technological and innovative solutions for the construction of agrivoltaic plants in Italy.

On the 22nd April 2021, ENEA and ETA - Florence signed a Memorandum of Understanding for the creation of the platform, followed by the official launch of the initiative on 27 April during the 29th edition of EUBCE.

ETA - Florence will be responsible for the development of the dedicated website, the platform management, the communication together with the organization of events and webinars.

For further information and register on the platform visit [agrivoltaicosostenibile.com](http://agrivoltaicosostenibile.com)

Have already expressed support for the national network for sustainable agrivoltaic: Associazione Italiana Architettura del Paesaggio (AIAPP), Confagricoltura, Consiglio dell'Ordine Nazionale dei Dottori Agronomi e Dottori Forestali (CONAF), Coordinamento FREE (Coordinamento Fonti Rinnovabili ed Efficienza Energetica), Italiasolare, Legambiente, Università Cattolica del Sacro Cuore, REMTec and Società Italiana di Agronomia (SIA).
